FENESTRATION & OPENINGS SUMMARY

- Doors (14 total): 12 single-leaf swing, 1 double swing, 1 terrace slider.
- Windows (11 total): 10 exterior perimeter units + 1 master bed terrace unit.
- Sill Heights: All windows set to *900 mm default (unverified on sketch).

GENERAL ARCHITECTURAL NOTES & VARIANCES

1. UNC-01 DIMENSION DISCREPANCY: Handwritten west dimension indicates 14,200 mm (giving 5,000 + 14,200 = 19,200 mm), while east perimeter run is 16,000 + 3,000 = 19,000 mm. A 200 mm variance exists. Geometry preserves nominal 14,000 mm run per human approval REV-03 without forced reconciliation.

2. UNC-02 BATHROOM AREA CONFLICT: Main bathroom source label shows 6.5 m², conflicting with physical partition enclosure at Y = 9,200 mm (yielding clear 9.8 m²). The physical wall line is retained to prevent artificial distortion of adjacent spaces.

3. MASTER BEDROOM WINDOW PROVENANCE: Window W-MASTER-BED centered at [5000, 10100] along host wall W-EXT-WEST-MAIN facing outdoor terrace. Classified as inferred correction.

4. AIA LAYER STANDARDS: Lineweights: A-WALL-EXTR 0.50mm, A-WALL-INTR 0.35mm, A-DOOR 0.25mm, A-GLAZ 0.25mm, A-FURN 0.18mm, A-FIXT 0.18mm, A-COLS 0.50mm, A-ANNO 0.18-0.25mm.

5. RELEASE STATUS & GOVERNANCE: SUPERVISED EXPERIMENTAL CAD OUTPUT. Human review asserted under supervised pilot protocols. Does not constitute statutory architectural certification or professional stamp.
